"We are pleased to deliver a resilient quarter with solid business recovery and continued improvement in profitability post our product restructuring and pandemic resurgence in the first half this year," said Mr. Ning Tang, Chairman and Chief Executive Officer of Yiren Digital.

"Regarding our holistic wealth business, our insurance brokerage business continues its strong momentum this quarter, becoming an essential revenue pillar. In the third quarter of 2022, our total premiums reached RMB1 billion, representing a 36% increase year on year, surpassing the industry average growth rate by over six times. Revenue generated from Hexiang Insurance brokerage services reached RMB189 million, accounting for more than 22% of total revenue in the third quarter this year, and we expect to see an accelerated double-digit growth in the fourth quarter, driven by our outstanding capabilities in product customization and innovation."

"On our credit-tech business, new loan portfolios post the product optimization enjoy higher operating efficiencies and lower borrowing costs, translating into healthier unit economics that allows us to better scale. In the third quarter this year, our total loan volume reached RMB6.3 billion, accounting for 66% of total loans facilitated in the first half this year and reaching close to pre-restructuring level. Given the current strong demand for our loan-facilitation services, especially for our small revolving loans, we project a further two-digit growth quarter over quarter in total loan volume in the fourth quarter this year."

"We delivered a solid profit of RMB270 million this quarter, reflecting a net income margin of 32.2%, up 6.2 percentage points from the same period of last year as we enjoy better unit economics post the product-restructuring and continue to improve our cost control," said Ms. Na Mei, Chief Financial Officer of Yiren Digital. "Turning to our balance sheet, we remained at a strong cash position with usable cash reaching RMB4.7 billion as of September 30, 2022, reserving sufficient buffer for the further execution of our share repurchase plan announced earlier this year as well as providing

enough fuels for any new business opportunities going ahead."

Non-GAAP Financial Measures

In evaluating the business, the Company considers and uses several non-GAAP financial measures, such as adjusted EBITDA and adjusted EBITDA margin as supplemental measures to review and assess operating performance. We believe these non-GAAP measures provide useful information about our core operating results, enhance the overall understanding of our past performance and prospects and allow for greater visibility with respect to key metrics used by our management in our financial and operational decision-making. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The non-GAAP financial measures have limitations as analytical tools. Other companies, including peer companies in the industry, may calculate these non-GAAP measures differently, which may reduce their usefulness as a comparative measure. The Company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating our performance. See "Operating Highlights and Reconciliation of GAAP to Non-GAAP measures" at the end of this press release.
